Volume 185 1987

## Contents

**Letters to the Editor**

Dynamical friction and shells around elliptical galaxies
*Dupraz, C., Combes, F.* L1

The disruption of a light neutron star in an ultra-close binary and the second neutrino burst from SN 1987 A
*Stella, L., Treves, A.* L5

Which photometric period for WR 16?
*Manfroid, J., Gosset, E., Vreux, J.M.* L7

Deconvolution of a pre-outburst picture of SN 1987 A
*Heap, S.R., Lindler, D.J.* L10

The modulation of neutrinos from SN 1987 A during stellar collapse
*de Jager, O.C.* L13

**Cosmology**

Comments on smoothing cosmologies
*Hemmerich, A.* 1

**Extragalactic astronomy**

Spectroscopic survey of the Case blue and emission line galaxies
*Augarde, R., Figon, P., Kunth, D., Sèvre, F.* 4

The inverse Compton test for a large sample of compact radio sources
*Biermann, P.L., Kühr, H., Snyder, W.A., Zensus, J.A.* 9

Rotationally excited OH in megamaser galaxies
*Henkel, C., Güsten, R., Baan, W.A.* 14

Near-infrared photometry of globular clusters in the outer halo of M 31
*Bònoli, F., Delpino, F., Federici, L., Fusi Pecci, F.* 25

The initial mass function for massive stars: a comparison between the total H α and ultraviolet fluxes of a sample of spiral and irregular galaxies
*Buat, V., Donas, J., Deharveng, J.M.* 33

Composite models for the narrow emission line region of active galactic nuclei. V. The line profiles
*Contini, M., Viegas-Aldrovandi, S.M.* 39

Chemical evolution of elliptical galaxies
*Matteucci, F., Tornambè, A.* 51

Neutral hydrogen observations of four dwarf irregular galaxies in the Virgo Cluster
*Skillman, E.D., Bothun, G.D., Murray, M.A., Warmels, R.H.* 61

The kinematical structure of the extended emission-line region of the early-type Seyfert-galaxy Mrk 3
*Wagner, S.J.* 77

Radio source structure from geodetic VLBI observations: 8 GHz multi-epoch maps of the quasar 4C 39.25
*Tang, G., Rönnäng, B., Bååth, L.* 87

**(RN)** An expanding shell of galaxies in the center of the Hydra I cluster?
*Fouqué, P.* 94

An interpretation of the line-strength indices in old stellar populations using an evolutionary synthesis approach
*Aragón, A., Gorgas, J., Rego, M.* 97

**Stellar clusters and associations**

**(RN)** White dwarfs in Omega Centauri?
*Ortolani, S., Rosino, L.* 102

**Formation, structure and evolution of stars**

NLTE models for cocoon stars
*Höflich, P., Wehrse, R.* 107

Roxburgh's criterion for convective overshooting
*Baker, N.H., Kuhfuß, R.* 117

Photometry and spectroscopy of the O-type variable HD 167971
*Leitherer, C., Forbes, D., Gilmore, A.C., Hearnshaw, J., Klare, G., Krautter, J., Mandel, H., Stahl, O., Strupat, W., Wolf, B., Zickgraf, F.-J., Zirbel, E.* 121

A high precision photometric investigation of the micro-variations of Wolf-Rayet stars
*van Genderen, A.M., van der Hucht, K.A., Steemers, W.J.G.* 131

CCD photometry of V 926 Sco, the optical counterpart of the X-ray burst source 4U/MXB 1735-44
*van Amerongen, S., Pedersen, H., van Paradijs, J.* 147

Light-curve analysis of the W Serpentis objects W Crusis and RX Cassiopeiae
*Strupat, W.* 150

Hard spectral components in soft X-ray transients
*King, A.R., Lasota, J.P.* 155

The dynamical instability of a rotating cylinder as a model for a Keplerian disk
*Hanawa, T.* 160

Evolutionary models for R CrB stars
*Weiss, A.* 165

Linear nonadiabatic pulsations of R CrB models
*Weiss, A.* 178

Five-colour *(UBVRI)* polarimetry of H 0139–68 = BL Hydri
*Piirola, V., Reiz, A., Coyne, G.V.* 189

Neutron star precession and the dynamics of the superfluid interior
*Alpar, A., Ögelman, H.* 196

**(RN)** The reclassification of the supposed dwarf nova V 1285 Cygni as a semiregular variable
*Bruch, A., Aniol, R., Cunow, B.* 203

**Stellar atmospheres**

IRAS observations of Be stars. II. Far-IR characteristics and mass loss rates
*Waters, L.B.F.M., Coté, J., Lamers, H.J.G.L.M.* 206

Line blanketed model atmospheres of Ap-stars. VI. HD 221568
*Stępień, K., Muthsam, H.* 225

Microturbulence in the upper photosphere of α Persei (F5 Ib) derived from ultraviolet spectral observations
*Spaan, F.H.P., de Jager, C., Nieuwenhuijzen, H., Kondo, Y.* 229

Chromospheric Mg II *h* and *k* emissions free of interstellar contamination: velocity structure in late-type dwarfs and giants
*Vladilo, G., Molaro, P., Crivellari, L., Foing, B.H., Beckman, J.E., Genova, R.* 233

Models for stellar coronae: thin coronae with radiative forces
*Hearn, A.G.* 247

EUV photometry of DA white dwarfs with EXOSAT
*Jordan, S., Koester, D., Wulf-Mathies, C., Brunner, H.* 253

Kinematic structure of OH/IR stars
*Sun, J., Kwok, S.* 258

**Diffuse matter in space (including HII regions and planetary nebulae)**

The Beta Pictoris circumstellar disk. V. Time variations of the Ca II-K line
*Ferlet, R., Hobbs, L.M., Vidal-Madjar, A.* 267

VLA observations of the 6 cm and 2 cm lines of $H_2CO$ in the direction of W 3(OH)
*Dickel, H.R., Goss, W.M.* 271

NGC 2264: a molecular line study
*Krügel, E., Güsten, R., Schulz, A., Thum, C.* 283

Variations in UV extinction in galactic associations and perpendicular to the galactic plane
*Kiszkurno-Koziej, E., Lequeux, J.* 291

The vicinity of Omicron Per
*Bachiller, R., Cernicharo, J., Goldsmith, P., Omont, A.* 297

**The Sun**

Generation and structure of the electric currents in a flaring activity complex
*Hénoux, J.C., Somov, B.V.* 306

**The solar system**

The nature of Saturn's atmospheric Great White Spots
*Sanchez-Lavega, A., Battaner, E.* 315

Comparison of Bretagnon's VSOP 82 theory with observations of Neptune
*Gomes, R.S., Ferraz-Mello, S.* 327

**Physical and chemical processes**

Probabilistic interpretation of radiative transfer. I. The $\sqrt{\varepsilon}$-law
*Hubeny, I.* 332

Probabilistic interpretation of radiative transfer. II. Rybicki equation
*Hubeny, I.* 336

**Instruments, data processing, and computational methods**

The identification of vignetted sources in coded aperture imaging
*Stephen, J.B., Caroli, E., Di Cocco, G., Maggioli, P.P., Natalucci, L., Spizzichino, A.* 343

**(RN)** Expected number of new variable stars by TYCHO photometry with HIPPARCOS
*Mauder, H., Høg, E.* 349

**Abstracts of articles which have been published in A. & A. Suppl. Ser. 70, No. 3**

Infrared observations of metal-deficient stars
*Arribas, S., Martinez Roger, C.* 354

Photometry and spectroscopy of stars in the region of a highly reddened cluster in Ara
*Westerlund, B.E.* 354

Position observations of the five greatest Uranian satellites and comparison with theory
*Veiga, C.H., Vieira Martins, R., Veillet, C., Lazzaro, D.* 354

Catalogue of cataclysmic binaries, low-mass X-ray binaries and related objects (fourth edition)
*Ritter, H.* 355

*UBVRI* photometry of FKSZ stars. I
*Carrasco, G., Loyola. P.* 355

Radial velocities in three fields along the southern galactic equator
*Denoyelle, J.* 355

Membership of Cepheids and red giants in 8 open clusters: NGC 129, 6067, 6087, 6649, 6664, IC 4725, Ly 5, Ru 79
*Mermilliod, J.C., Mayor, M., Burki, G.* 356

Five years monitoring of extragalactic radio sources. I. Observations at 12, 22 and 37 GHz
*Salonen, E., Teräsranta, H., Urpo, S., Tiuri, M., Moiseev, I.G., Nesterov, N.S., Valtaoja, E., Haarla, S., Lehto, H., Valtaoja, L., Teerikorpi, P., Valtonen, M.* 356

Near-IR observations of Sharpless regions. I. S269, S271, S307 and S311
*Persi, P., Ferrari-Toniolo, M., Shivanandan, K., Spinoglio, L.* 356

Spectral features of the B2e star EW Lac before and during the variable shell phase
*Hubert, A.M., Floquet, M., Chauville, J., Chambon, M.T.* 357

Box-shaped galaxies: a complete list
*de Souza, R.E., dos Anjos, S.* 357

An atlas and catalogue of northern dwarf novae
*Bruch, A., Fischer, F.-J., Wilmsen, U.* 357

The effects of interactions on spiral galaxies. III. A radio continuum survey of galactic nuclei at 1.49 GHz
*Hummel, E., van der Hulst, J.M., Keel, W.C., Kennicutt, R.C., Jr.* 358

*Erratum:* The $-33° \leqq \delta \leqq -17°$ zone: probing SRC *J* film copies for planetary nebulae
*Saurer, W., Weinberger, R.* 358

*Erratum:* Photometric variability of Ap and He-weak stars in clusters and associations. II
*North, P.* 358

*Erratum:* Anomalous Zeeman effect: moments and expansion coefficients
*Mathys, G., Stenflo, J.O.* 358
